

ArrowElite™ Rollerless Case Conveyors

Table Top and Mat Top carrying surface

- Maximum product support for today's packages – including shrink bundles without corrugated trays
- Eliminates “point contact” areas common to live roller conveyors
- Full product support area will wear evenly and last longer
- Versatile surface transports and accumulates both rigid and flexible packages – even around curves
- Ease of maintenance and fewer moving parts reduces total cost of ownership

Heavy Duty Modular Design

- Simplified installation and maintenance
- Maximizes our investment by allowing you to re-configure conveyors to adapt to new production requirements

Fully powered drive and idle transfer points

- Self clearing transfer areas minimize product contact and build-up of line pressure

Shaft mounted drives

- Ease of maintenance and quieter operation

Zero pressure zoned accumulation areas available

- Minimizes pressure during line backups
- Simple, Unique, Patent-pending reliable accumulation actuator for maximum uptime and ease of maintenance
- Optional Center Lift bars for the accumulation zones can handle large and small packages on the same system
- Capable of handling both rigid & flexible packages

Many Options Available

- Package merge and divert sections
- Custom package guides
- Incline and Decline models available
