

# ArrowTower™ Series Gripper Elevators / Lowerators

Tower  
Elevator

Tower  
Lowerator

## Features and Benefits

- Arrowhead gripper elevators and lowerators offer an effective means of elevating or lowering a variety of containers and products when space is at a minimum.
- Gripper elevators and lowerators are widely accepted in systems where incline conveyors are not practical.
- Our side grip design gently secures the product during elevation changes.
- Air cylinder controlled gripper chain take-ups offer reliable chain tensioning.
- We also offer a horizontal version for bottom coding applications.
- Available in mild steel or stainless steel construction.
- Synchronized inverter duty gearmotors.
